

Fun, friends, and support for kids and teens with IBD

Camp Oasis Changes Lives

Research confirms the transformative impact that Camp Oasis has on kids living with IBD.

Campers build confidence and life-long friendships, share new adventures, and connect with a community of support.

Residential locations across the country prioritize the highest standard of care and a wide range of activities.

CampOasis@Home brings campers together virtually to hang out and engage in interactive sessions.

There is a place for everyone at Camp Oasis.

Volunteers Make the Difference

Adult patients and healthcare providers who volunteer are rewarded with unforgettable experiences and deeper connections with the IBD community.

Volunteer positions include:

- Counselors (must be 19+)
- Dietitians
- Physicians
- Nurses
- Mental Health Specialists

Camp Oasis volunteers are essential to the safety and well-being of our campers at residential sites and CampOasis@Home.
